

# Mason Jar Candle Holder

## Materials Needed:

- Tissue Paper (variety of colors)
- Mason Jar (any reused jar works)
- Scissors
- White Glue
- Water
- Paint Brush
- Tea or votive candle (with an adults help)
- Plastic bag or newspaper (for your workspace)

## 1. Cut tissue paper in to ½"-1" squares.

## 2. Mix glue with water, approximately 3 parts glue 1 part water. A little glue goes a long way.

## 3. Paint glue onto jar.

- Paint glue on in small sections so that glue does not dry while tissue paper is being added.

**4. Place squares of tissue paper on the jar.**

- You can overlap the tissue, space the tissue apart or make designs with the tissue for different effects.
- Once the jar is covered with tissue paper, go over any loose ends with the glue. Painting right over top will keep loose corners of paper down.

**5. Place candle in the jar and ask an adult to light the candle.**

- Always have an adult present when a candle is lit.
  - Always monitor the candle and blow out the candle when finished (never leave a burning candle unattended).
